OCCUPATIONAL DESIGN

Because working at intermediate distances deserves a specific lens

HAVE YOU NOTICED YOU NEED SUPERIOR VISION FOR CERTAIN ACTIVITIES?

General progressive lenses allow you to see clearly in all distances. However, if you spend long periods of time working at a desk, you may notice your vision starts to become compromised and it takes some effort to focus.

SD Reach is a **specific lens for working at the desk** that offers you an unsurpassed level of visual quality and postural comfort.

ENJOY MORE COMFORTABLE VISION WHILE WORKING IN A CLOSE ENVIRONMENT

Your ideal second pair of glasses for working at the desk:

- Less eyestrain
- Improved vision
- More relaxed posture
- Increased agility for precise focus
- Extended zones exclusively for intermediate and reading

Not for driving
